Fast on the Outside...

Car designers go to great lengths to impress potential buyers by creating sleek profiles with stylish lines and curves. Many of these cars look like they can fly, but fail to impress when you punch the accelerator. Here is a short list of cars that have that look, but no punch to back it up.

Porsche Cayenne

Looks fast for an SUV and it is a "Porsche", but the standard model is powered by a 3.6-liter

V6 engine with 300 horsepower and 295 pound-feet of torque, which isn't quite enough considering the vehicles weight. Try the Turbo or GTS model to get that boost you would expect from Porsche.

Dodge Dart

Even its name sounds quick, but the [Dodge Dart](#) is anything but fast. The Dart comes standard with a 2.0-liter

four-cylinder engine with 160 hp and 148 lb-ft of

torque. There are other engine options available, but all will get you there in about the same time – late.

Mazda MX-5 Miata

A great looking roadster, the Miata corners with the best of them, but fails on the straightaways.

Equipped with a 2.0-liter four-cylinder engine with 155 hp and 148 lb-ft of torque, the Miata is still fun to drive.

DeLorean DMC-12

Famous because of *Back to the Future*, but there was nothing fast about the car itself - even with the gullwing

doors. The original vehicle came equipped with a 2.8-liter V6 engine that made around 130 hp. Only movie magic could make this car fly.

Honda CR-Z
 Successor to the CR-X, but the CR-Z turned out to be a hybrid putting out a meager 130 hp and

140 lb-ft of torque with a six-speed manual transmission. Failing to impress, it has been discontinued from Honda's lineup.

Scion FR-S
 Few look as fast as the Scion FR-S, but be prepared to be disappointed with its' 2.0-liter Boxer engine under the hood producing 200 hp and 151 lb-ft of torque.

with the California DMV that has halted the project.

Car Care "Tip of the Month"

Check your windshield blades and wiper fluid!

Don't wait for the snow and road spray - replace your old wiper blades and top off your wiper fluid BEFORE you need it. Foul weather is just around the

corner so get prepared now! Check your wiper fluid regularly during the winter season and keep a couple of extra gallons in your garage or trunk to make sure you're never caught without it.

Self Driving Uber?

After nearly 2 years of testing in Uber's Advanced Technologies Center located in Pittsburgh, self-driven Uber cars made their debut in the "Steel City" earlier this fall. Although the cars are self-driven, drivers are present for safety and any human intervention that may be needed. Uber's main focus for this technology is less congestion, improved safety, and less lives lost on the roadways. Uber also began piloting these cars in San Francisco, but ran into some permitting issues

Did You Know?

"Auld Lang Syne" meaning "times gone by", is an old Scottish song from the 1700's.

+++++

With its' proximity to the International Date Line, Hawaii is the last state and nearly the last inhabited place in the world to celebrate each New Year.

+++++

Using scissors or knives during the Chinese New Year is considered bad luck.

January 2017 New Years Special!
