Top Automotive Technologies for 2023...

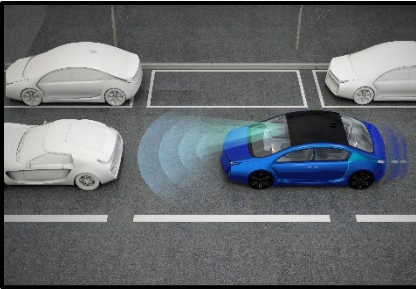

Connected Features

Whether built-in Wi-Fi network or a dedicated app to let you start the car, lock the doors, and more from your phone cars continue to become more connected to their drivers. Apps can also make it easier to take care of car maintenance. Sensors in the vehicle can notify you on your phone when it's time to replace or repair some parts.

Autonomous Features

Continuous improvements to self-driving features are another 2023 trend to keep an eye on. Autonomous features like lane assist and automatic parking will become more common and functional

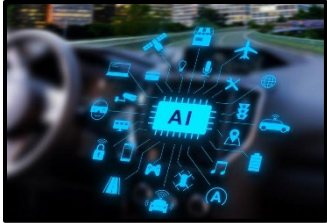

this year. Level 3 autonomous driving is on the rise in the U.S. These cars can do many basic driving functions on their own –

these include parking, steering, braking, accelerating and navigation.

Artificial Intelligence (AI)

Artificial intelligence is what makes driverless cars possible, but AI will begin improving other automotive technologies. Smart Assistants will become more prevalent in cars. Mostly voice-activated, with these

AI tools, you can control things throughout your car like adjusting your music or opening garage doors while keeping your hands on the wheel. Smart features can detect if you may be tired and alert you to focus on the road or pull over. Some automakers are also using the technology to personalize vehicles to specific customers.

Graeves Auto & Tire
 is a AAA approved auto repair center.

In the Community...

Spring is finally here, and kids will be spending more time outdoors. Please drive with care and watch for kids playing near roadways everywhere!

Car Safety Tip of the Month!

Winter is over, so here is a short list of safety tips for driving in the Spring...

Look for Leftover Sand and Salt

Once the snow is gone, sand and salt often remain, making traction difficult. Take care at intersections and give yourself a little extra braking time.

Careful in the Rain

Spring showers can create tricky driving conditions. Safe driving in a rainstorm means turning your headlights on, driving slowly and giving other vehicles more space.

Avoid Flooded Roads

When approaching a flooded road, turn around and find a safe route. Standing water can have strong undercurrents.

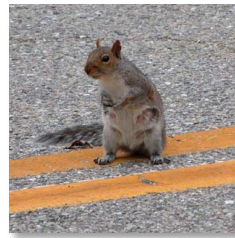

Look for Potholes

Combine salt, sand, snowplows and alternating cold and warm weather and you've got the perfect conditions for creating new potholes.

Look for Pedestrians and Bikers

Everyone is ready to enjoy the warmer weather. This means increased motorcycles, bicycles and foot traffic on roads and shoulders.

Animal Crossing

Warmer weather also means the many animals will be coming out of hibernation.

Did You Know?

A dolphin's top speed is 37mph.
A shark's top speed is 44mph.

+++++

After Hawaii, New York is the state surrounded by the most water.

+++++

A snail can sleep for 3 years.

+++++

More than 75% of all countries are north of the equator.
