

A monthly publication filled with industry news, maintenance and safety tips, upcoming events, special coupons, and more!

- Turn on your lights to increase your visibility to other motorists.
- Keep your lights and windshield clean.
- Use low gears to keep traction, especially on hills.
- Don't use cruise control or overdrive on icy roads.
- Be especially careful on bridges, overpasses and infrequently traveled roads, which will freeze first.

Driving Tips for Snow & Ice...

The best advice for driving in bad winter weather is not to drive at all, if you can avoid it. Don't go out until the snow plows and sanding trucks have had a chance to do their work, and allow yourself extra time to reach your destination. If you must drive in snowy conditions, make sure your car is prepared, and that you know how to handle road conditions.

Driving safely on icy roads:

- Decrease your speed and leave plenty of room to stop. Allow at least three times more space than usual between you and the car in front of you.
- Brake gently to avoid skidding. If your wheels start to lock up, ease off the brake.

If your rear wheels skid:

- Take your foot off the accelerator.
- Steer in the direction your rear wheels are sliding. You might have to steer left and right a few times to get your vehicle completely under control.
- If you have standard brakes, pump them gently.
- If you have anti-lock brakes (ABS), apply steady pressure to the brakes. You will feel the brakes pulse — this is normal.

If you get stuck...

- Do not spin your wheels. This will only dig you in deeper.
- Turn your wheels from side to side a few times
