Car Care Tip of the Month!

When is the last time you checked your battery? Often overlooked, batteries do need to be checked from time to time. While most automotive batteries are sealed and maintenance free, they do not last forever.

- Check to make sure the battery is properly secured and that the bracket is in good shape.

Did You Know?

The original design of Monopoly was circular.

+++++

The Earth is struck by lightning over 100 times every second.

+++++

More people die from falling coconuts than from shark attacks.

+++++

For every human there are 200 million insects.

+++++

The word racecar can be spelled the same way backwards.

- Make sure your battery cables are properly secured to the positive and negative terminals.
- Look for any corrosion on the terminals that can be cleaned, but may be a sign of other issues.
- Have the voltage tested to ensure the battery is in a good operating range.
